

TABLE OF CONTENTS

PART I

INTRODUCTORY OUTLINES

CHAP.	PAGE
I. Chemical Change—The Constitution of Matter—Molecules—Atoms	1
II. Elements and Compounds—Mixtures—Chemical Affinity—Modes of Chemical Action	6
III. Chemical Nomenclature	15
IV. Chemical Symbols	21
V. The Atomic Theory—Laws of Chemical Action	25
VI. Atomic Weights—Modes of Determining Atomic Weights	34
VII. Quantitative Chemical Notation	53
VIII. Valency of the Elements	59
IX. General Properties of Gases—Relation to Heat and Pressure—Liquefaction—Diffusion—The Kinetic Theory	69
X. Dissociation—Reversible or Balanced Actions	88
XI. Electrolysis—Electrolytic Dissociation—The Ionic Theory	96
XII. Classification of the Elements—The Periodic System	112
XIII. General Properties of Liquids—Evaporation, Boiling, Vapour Pressure of Solutions—The Passage of Liquids into Solids—Freezing Point of Solutions—Raoult's Method	126
XIV. Solution—Gases in Liquids—Liquids in Liquids—Solids in Liquids—Osmotic Pressure—Crystalline Forms	142
XV. Thermo-chemistry	163

PART II

THE STUDY OF FOUR TYPICAL ELEMENTS

Hydrogen — Oxygen — Nitrogen — Carbon, AND THEIR MORE IMPORTANT COMPOUNDS.

I. <i>Hydrogen</i> —Hydrogenium	171
II. <i>Oxygen</i> —Allotropy—Ozone	181
III. Compounds of Hydrogen with Oxygen	203

CHAP.	PAGE
IV. <i>Nitrogen</i>	229
V. Oxides and Oxy-acids of Nitrogen	234
VI. The Atmosphere and the Argon Group of Elements	252
VII. Compounds of Nitrogen and Hydrogen—Hydroxylamine— Ammon-sulphonates ; Halogen Compounds of Nitrogen .	272
VIII. <i>Carbon</i>	285
IX. Carbon Monoxide—Carbon Dioxide—Carbonates	295
X. Compounds of Carbon with Hydrogen—Methane—Ethylene— Acetylene	312
XI. Combustion—Heat of Combustion—Ignition Point—Flame— Structure of Flame—Cause of Luminosity of Flames— The Bunsen Flame	321

PART III

THE SYSTEMATIC STUDY OF THE ELEMENTS, BASED
UPON THE PERIODIC CLASSIFICATION

I. ELEMENTS OF GROUP VII. (FAMILY B.)	
<i>Fluorine</i> : Hydrofluoric Acid. <i>Chlorine</i> : Hydrochloric Acid—Oxides and Oxyacids of Chlorine. <i>Bromine</i> : Hydrobromic Acid—Oxyacids of Bromine. <i>Iodine</i> : Hydriodic Acid—Oxyacids of Iodine—Periodates	
	345
II. ELEMENTS OF GROUP VI. (FAMILY B.)	
<i>Sulphur</i> : Compounds of Sulphur with Hydrogen—Compounds with Chlorine—Oxides and Oxyacids of Sulphur—Oxychlorides—Carbon Disulphide. <i>Selenium</i> — <i>Tellurium</i>	
	397
III. ELEMENTS OF GROUP V. (FAMILY B.)	
<i>Phosphorus</i> : Compounds with Hydrogen—Compounds with the Halogens—Oxides and Oxyacids. <i>Arsenic</i> : Arsenuretted Hydrogen—Halogen Compounds—Oxides and Oxyacids—Sulphides. <i>Antimony</i> : Antimony Hydride—Halogen Compounds—Oxides and Acids—Sulphides. <i>Bismuth</i> : Bismuth and Halogens—Oxides—Sulphides	
	450
IV. ELEMENTS OF GROUP I. (FAMILY A.)	
<i>Potassium</i> — <i>Sodium</i> — <i>Lithium</i> — <i>Rubidium</i> —Ammonium Salts	
	505
V. ELEMENTS OF GROUP I. (FAMILY B.)	
<i>Copper</i> — <i>Silver</i> — <i>Gold</i>	
	549

Contents

xv

CHAP.	PAGE
VI. ELEMENTS OF GROUP II. (FAMILY A.) <i>Beryllium—Magnesium—Calcium—Strontium—Barium</i>	570
VII. ELEMENTS OF GROUP II. (FAMILY B.) <i>Zinc—Cadmium—Mercury</i>	590
VIII. ELEMENTS OF GROUP III. FAMILY A. : <i>Scandium—Yttrium—Lanthanum—Ytterbium.</i> FAMILY B. : <i>Boron—Aluminium—Gallium—Indium—Thallium</i>	606
IX. ELEMENTS OF GROUP IV. FAMILY A. : <i>Titanium—Zirconium—Cerium—Thorium.</i> FAMILY B. : <i>Silicon—Germanium—Tin—Lead</i>	627
X. ELEMENTS OF GROUP V. (FAMILY A.) <i>Vanadium—Niobium—Tantalum</i>	655
XI. ELEMENTS OF GROUP VI. (FAMILY A.) <i>Chromium—Molybdenum—Tungsten—Uranium</i>	657
XII. ELEMENTS OF GROUP VII. (FAMILY A.) <i>Manganese</i>	666
XIII. TRANSITIONAL ELEMENTS OF THE FIRST LONG PERIOD. <i>Iron—Cobalt—Nickel</i>	671
XIV. TRANSITIONAL ELEMENTS OF THE SECOND AND FOURTH LONG PERIOD. <i>Ruthenium—Rhodium—Palladium—Osmium—Iridium—Platinum—Argon—Helium</i>	690
APPENDIX: RADIUM, AND RADIOACTIVE ELEMENTS	697
INDEX	705
