

# I N D E X

- Abscisic acid, 1027  
 Absolute configuration, 267–271, 292  
 Absorption of electromagnetic radiation, 489  
   in infrared spectroscopy, 518  
   in nuclear magnetic resonance spectroscopy, 490–493  
   in ultraviolet-visible spectroscopy, 524–525  
 Absorptivity. *See* Molar absorptivity  
 Acetaldehyde, 655  
   bond angles, 657  
   enolization of, 706  
   formation of, in biological oxidation of ethanol, 600–602  
   preparation of  
     from ethylene, 248, 598  
     by hydration of acetylene, 356  
   reactions of  
     aldol addition, 716  
     with hexylmagnesium bromide, 555  
     hydration, 663  
   in Strecker synthesis of D,L-alanine, 1061–1062  
 Acetaldehyde, 716  
 Acetals, 668–672, 689  
   glycosides as, 989  
   hydrolysis of, 670, 672  
   preparation of, 669–671, 672, 689  
   as protecting group, 671–672  
 Acetamide  
   electrostatic potential map, 777  
 Acetanilide, 879  
   preparation and nitration of, 887  
   reduction of, 879  
   resonance in, 886  
 Acetic acid  
   acidity of, 740–742, 746, 747  
   conversion to mevalonic acid, 1028, 1032–1033  
   electrostatic potential maps  
     acetate ion, 741, 742  
     acid, 739, 742  
   esterification of, 594, 610  
   industrial preparation and use of, 750, 783  
   natural occurrence of, 4, 736, 750  
   natural products derived from, 1015–1050  
 Acetic anhydride, 775  
   electrostatic potential map, 777  
   in Friedel-Crafts acylation, 455, 471, 473, 478, 784  
   preparation of, 783  
   reactions of  
     with alcohols, 610, 785, 789  
     with arylamines, 785, 886  
     with  $\alpha$ -D-glucopyranose, 1004  
     with glycine, 1063  
     with phenols, 949, 951–952, 963  
     with salicylic acid, 952  
     with sucrose, 1010  
   UV absorption, 818  
 Acetoacetic ester synthesis, 839–841, 850. *See also* Ethyl acetoacetate  
 Acetoacetyl acyl carrier protein, 1021  
 Acetoacetyl coenzyme A, 1021, 1032  
 Acetone  
   bond angles, 657  
   enolization of, 704, 706  
   electrostatic potential map, 701  
   reactions of  
     aldol condensation, 720  
     bromination, 704–705  
     cyanohydrin formation, 667  
     hydration, 663  
     reductive amination of, 903  
     Wittig reaction, 690  
   as solvent, 305  
 Acetonitrile  
   electrostatic potential map, 777  
   UV absorption, 818  
 Acetophenone, 407, 455, 656  
   acidity of, 710  
   acylation of enolate, 837  
   phenylhydrazone, 674  
   reactions of  
     aldol condensation, 720  
     bromination, 473  
     with butyllithium, 582  
     chlorination, 474  
     with ethylmagnesium bromide, 559  
     nitration, 473  
 Acetyl chloride, 775  
   electrostatic potential map, 774, 777  
   reactions of  
     with arylamines, 886  
     with *tert*-butyl alcohol, 610  
     with phenol, 951  
   UV absorption, 818  
 Acetyl coenzyme A  
   in fatty acid biosynthesis, 1019–1022  
   formation from pyruvic acid, 1016  
   reactions of, 1016  
   structure, 1016  
   in terpene biosynthesis, 1032  
 Acetylene  
   acidity of, 336, 344–346, 552  
   alkylation of, 336, 346–348, 359  
   bonding in, 14, 40–42, 47, 54, 341–343  
   conversion to cyclooctatetraene, 422  
   electrostatic potential map, 339, 342  
   Grignard reagent of, 553  
   hydration of, 356  
   preparation of, 339–340  
   structure of, 341–342  
   *N*-Acetyl-D-galactosamine, 995, 996  
   *N*-Acetyl-D-glucosamine, 988  
   Acetylide ion, 336, 345–346, 348. *See also* Sodium acetylide  
   *O*-Acetylsalicylic acid. *See* Aspirin  
 Achiral molecules, 260, 290  
   meso forms, 279–282  
   symmetry elements in, 264–265  
 Acid anhydrides. *See* Carboxylic acid anhydrides  
 Acid-base properties of amino acids, 1057–1061  
 Acid-base reactions, 133–137, 344–346, 551–553, 604, 708–711, 864–865  
 Acid catalysis  
   of acetal formation, 669–671, 672  
   of acetal hydrolysis, 672  
   of amide hydrolysis, 805–807, 821  
   of dehydration of alcohols, 182, 185–190, 200, 419, 591  
   of epoxide ring opening, 632–633, 635–637, 646  
   of ester hydrolysis, 791–794, 820  
   of esterification, 593–594, 610, 754–757, 767  
   of ether formation, 592–593, 610, 625–626, 644  
   of glycoside formation, 990  
   of hydration of alkenes, 225–227, 249  
   of hydration of alkynes, 355–356, 361  
   of nitrile hydrolysis, 815–816, 822  
   of nucleophilic acyl substitution, 786–787, 949  
   of nucleophilic addition to aldehydes and ketones, 665–667, 690–691  
 Acid dissociation constants,  $K_a$  and  $pK_a$ , 134, 336, 343, 345–346, 552, 710, 745–749, 864–865, 944. *See also* Acidity  
 Acidity  
   of acetylene and alkynes, 336, 343, 344–346, 358, 552  
   of alcohols, 135  
   of aldehydes, 710  
   of alkanes, 344–345, 552  
   of ammonia, 135, 345–346, 848  
   of ammonium ions, 135, 864–865  
   of benzene, 552  
   of carbonic acid, 749  
   of carboxylic acids, 740–749, 765–766  
     substituent effects on, 745–748  
   of 1,3,5-cycloheptatriene, 429  
   of 1,3-cyclopentadiene, 428  
   definition of  
     Arrhenius, 134  
     Brønsted-Lowry, 134–136  
     Lewis, 143

- of dicarboxylic acids, 748  
of diethyl malonate, 842  
of diisopropylamine, 848  
of  $\beta$ -diketones, 710  
of esters, 848  
of ethane, 343, 552  
of ethanol, 135, 552, 740–741  
of ethyl acetoacetate, 839  
of ethylene, 343, 552  
of hydrocarbons, 343–346, 552 table  
of hydrogen fluoride, 135, 345  
of  $\beta$ -keto esters, 832–834, 839, 850  
of ketones, 710  
of methane, 344–345, 552  
of phenols, 942–945, 962  
quantitative relationships, 743  
of representative compounds, 135 table, 552 table  
of substituted benzoic acids, 747–748  
of thiols, 604, 723  
of water, 135, 345, 552
- Aconitic acid, 299, 772  
Acrolein, 384, 721, 723, 729  
Acrylic acid, 737, 747  
Acrylonitrile, 14, 247, 815  
Activated complex, 93. *See also* Transition state  
Activation energy, 93. *See also* Energy of activation  
Active ester, 1080  
Acylation. *See* Friedel-Crafts acylation; Nucleophilic acyl substitution  
Acyl carrier protein, 1019–1022  
Acyl cations, 454, 784  
Acyl chlorides  
carbon-chlorine bond distance, 778  
enolization, 760  
Friedel-Crafts acylation with, 453–457, 478, 780, 951  
infrared absorption frequency, 519, 817  
nomenclature of, 775  
preparation of, 454, 754, 780  
reactions of, 780–783, 819–820  
with alcohols, 594, 595, 610, 781, 789  
with ammonia and amines, 781, 802, 820, 882, 886  
with carboxylic acids, 781  
with phenols, 949, 951–952  
with water, 781, 782  
resonance in, 778  
Acyl group, 654, 775  
Acyl halides, 775. *See also* Acyl chlorides  
Acyl transfer reactions. *See* Nucleophilic acyl substitution  
Addition-elimination mechanism of nucleophilic aromatic substitution, 923–927, 932–933  
Addition polymers, 247  
Addition reactions. *See also* Aldehydes; Alkenes; Alkynes; Dienes; Ketones  
1,2 addition *versus* 1,4 addition, 379–382, 392, 722–723  
anti addition, 212, 233–234, 236, 237, 250, 284, 351–352, 356–357  
Diels-Alder cycloaddition, 382, 392–393  
of benzyne, 931–932
- electrophilic  
to alkenes, 213–220, 223–243, 244–245, 249–251, 284–286  
to alkenylbenzenes, 419–421, 435  
to alkynes, 352–357, 361 table  
to conjugated dienes, 379–382, 392  
free-radical, to alkenes, 220–223, 245–246, 251  
hydrogenation  
of alkenes, 208–213, 249, 285  
of alkenylbenzenes, 419–420  
of alkynes, 350–351, 360  
of dienes, 374–375  
and Markovnikov's rule  
alkenes, 214–219, 251  
alkynes, 352–354, 356, 361  
nucleophilic  
to aldehydes and ketones, 663–700  
to  $\alpha,\beta$ -unsaturated aldehydes and ketones, 722–724, 728  
syn addition, 212, 230, 239–240, 250, 285, 351

acidity of, 135, 740–741, 943  
biological oxidation of, 600–602  
bonding, 129  
as Brønsted bases, 135–136  
classification of, 128, 160  
in Friedel-Crafts reactions, 950  
hydrogen bonding in, 130–131, 134, 160, 322  
hydrogen-deuterium exchange in, 166, 510  
infrared spectra, 519 table  
inorganic esters of, 595–596, 610  
mass spectra, 607  
naturally occurring, 580  
nomenclature of, 127–128, 159, 169
- nuclear magnetic resonance spectra  
carbon, 606  
proton, 509–510, 605–607  
physical properties, 130–133, 160  
preparation of  
from epoxides, 587–588, 608, 632, 635  
from Grignard reagents, 553–555, 557, 560–561, 572, 573, 582, 583, 608, 790  
by hydration of alkenes, 225–227, 249, 581  
by hydroboration-oxidation, 227–233, 250, 581  
by hydrolysis of alkyl halides, 582  
from organolithium reagents, 554–556, 572, 573, 582, 608  
by reduction of carbonyl compounds, 583, 608, 790  
via alkyl hydrogen sulfates, 224–225  
reactions of, 591 table, 610 table  
with acyl chlorides, 594–595, 610, 781  
with aldehydes and ketones, 668–672, 689  
with carboxylic acid anhydrides, 595, 610, 785–787  
conversion to ethers, 590–593, 610, 625–626, 644  
dehydration, 182, 185–190, 200, 379, 419, 591  
esterification, 593–595, 610, 754–757, 767, 789  
with hydrogen halides, 137–146, 160–162, 329–330, 332, 591  
with inorganic acids, 595–596, 610  
oxidation, 596–602, 611 table  
with phosphorus tribromide, 147, 161, 591  
with thioesters, 800  
with thionyl chloride, 147, 161, 591  
with *p*-toluenesulfonyl chloride, 326, 332, 591  
solubility in water, 132–133
- Aldaric acids, 1000  
Aldehydes  
acidity of, 710  
aldol condensation, 715–720, 728  
classification of carbons in, 702  
enolization of, 705–707, 727  
infrared spectra, 519, 684–685  
mass spectra, 687  
naturally occurring, 659  
nomenclature of, 654–656, 688  
nuclear magnetic resonance spectra, 496, 513, 684–686  
nucleophilic addition to, 663–682  
physical properties, 658  
preparation of  
hydroformylation of alkenes, 661, 732  
oxidation of primary alcohols, 596, 597, 611, 659  
ozonolysis of alkenes, 241–242, 660  
reactions of  
acetal formation, 668–672, 689  
with amines, 672–677, 689, 690, 882  
cyanohydrin formation, 667–668, 689  
with derivatives of ammonia, 674

- Aldehydes—*Cont.*  
 with Grignard reagents, 555, 572, 573, 662, 722  
 halogenation, 703–705, 727  
 hydration, 663–667, 689  
 hydrogenation, 583–584, 662
