Related titles:

Textiles for protection

(ISBN-13: 978-1-85573-921-5; ISBN-10: 1-85573-921-6)

In today's climate there is an increasing requirement for protective textiles. Whether it is for personal protection, protection against the elements, chemical, nuclear or ballistic attack, textiles that aid in protecting the wearer are a major requirement. This comprehensive new book brings together the leading protective textiles experts throughout the world. It covers a wide variety of areas, from materials and design, through protection, to specific hazards and finally concluding with specific application case studies. It is the first book of its kind to give a complete coverage of textiles for protection.

Materials in sports equipment

(ISBN-13: 978-1-85573-599-6; ISBN-10: 1-85573-599-7)

Improvements in materials technology have produced a significant impact on sporting performance in recent years. The relationship between material technology and design and their effects on sporting performance is the focus of this important new handbook. From topics related to the general use of materials in sports – for example for sports surfaces and the behaviour of balls and ballistics – the book goes on to explore in detail the particular requirements of materials for many of the most popular sports, including golf, tennis, cycling, mountaineering, skiing, cricket and paralympic sports. This book is an essential text for students on sports technology courses, manufacturers of sports equipment and materials scientists working with new materials with potential for sports applications.

Handbook of technical textiles

(ISBN-13: 978-1-85573-385-5; ISBN-10: 1-85573-385-4)

This major handbook looks at the manufacture, processing and applications of hi-tech textiles for a huge range of applications, including: heat and flame protection; waterproof and breathable fabrics; textiles in filtration; geotextiles; medical textiles; textiles in transport engineering; and textiles for extreme environments. It is an essential guide for textile yarn and fibre manufacturers; producers of woven, knitted and non-woven fabrics; textile finishers; designers and specifiers of textiles for new or novel applications as well as lecturers and graduate students on university textile courses.

Details of these books and a complete list of Woodhead's materials engineering titles can be obtained by:

- visiting our web site at www.woodheadpublishing.com
- contacting Customer Services (e-mail: sales@woodhead-publishing.com; fax: +44 (0) 1223 893694; tel.: +44 (0) 1223 891358 ext. 30; address: Woodhead Publishing Limited, Abington Hall, Abington, Cambridge CB1 6AH, England)

If you would like to receive information on forthcoming titles in this area, please send your address details to: Francis Dodds (address, tel. and fax as above; e-mail: francisdd@woodhead-publishing.com). Please confirm which subject areas you are interested in.
