## **The Textile Institute and Woodhead Publishing**

The Textile Institute is a unique organisation in textiles, clothing and footwear. Incorporated in England by a Royal Charter granted in 1925, the Institute has individual and corporate members in over 90 countries. The aim of the Institute is to facilitate learning, recognise achievement, reward excellence and disseminate information within the global textiles, clothing and footwear industries.

Historically, The Textile Institute has published books of interest to its members and the textile industry. To maintain this policy, the Institute has entered into partnership with Woodhead Publishing Limited to ensure that Institute members and the textile industry continue to have access to high calibre titles on textile science and technology.

Most Woodhead titles on textiles are now published in collaboration with The Textile Institute. Through this arrangement, the Institute provides an Editorial Board which advises Woodhead on appropriate titles for future publication and suggests possible editors and authors for these books. Each book published under this arrangement carries the Institute's logo.

Woodhead books published in collaboration with The Textile Institute are offered to Textile Institute members at a substantial discount. These books, together with those published by The Textile Institute that are still in print, are offered on the Woodhead web site at: [www.woodheadpublishing.com](http://www.woodheadpublishing.com). Textile Institute books still in print are also available directly from the Institute's website at: [www.textileinstitutebooks.com](http://www.textileinstitutebooks.com).

Woodhead Publishing also publishes the two Textile Institute journals: *The Journal of The Textile Institute* and *Textile Progress*. Both journals are editorially independent of the publisher, and have their own editors-in-chief and editorial boards. Details of these journals and how to subscribe to them can be found at: [www.woodheadpublishing.com](http://www.woodheadpublishing.com).

# CONTENTS

## Introduction

*M MirafTAB and R Horrocks, University of Bolton, UK* viii

## Part I Recycling and use of waste as raw materials

Perceptions towards clothes with recycled content and environmental awareness: the development of end markets

*Y Nakano, Northumbria University, UK* 3

Acoustic and mechanical properties of underlay manufactured from recycled carpet waste

*I Rushforth, K Horoshenkov and S N Ting, University of Bradford, UK, and M MirafTAB, University of Bolton, UK* 15

Carpet fiber recycling technologies

*Y Wang, Georgia Institute of Technology, USA* 26

Use of waste as raw materials: efficient recycling techniques

*S Macaulay, Anglo Felt Industries Ltd, UK* 33

## Part II Sustainability and ecodesign

Building ecodesign throughout the supply chain: a new imperative for the textile and clothing industry

*T Bhamra, Loughborough University, UK* 41

Supply chain partnerships for sustainable textile production

*J R Easton, DyStar, UK* 50

Molecular manufacturing for clean, low cost textile production

*D Forrest, Naval Surface Warfare Center and Institute for Molecular Manufacturing, USA* 59

The substitution of hemp and flax for cotton in wound spool filters

*C Sevajee and R Edyvean, University of Sheffield, UK* 75

It may be eco-friendly but is an INGEO™/cellulose blend strong enough to withstand wet processing?

*J Suesat and D Phillips, University of Manchester, UK* 91

Eco initiatives in the textile pipeline: a South African experience

*P Foure, Clothing and Textile Environmental Linkage Centre, South Africa, and T Mlauli, Department of Trade and Industry, South Africa* 96

### **Part III Sustainable development and renewables**

- The use of renewable resource based materials for technical textiles applications  
*R Shishoo, Shishoo Consulting AB, Sweden* 109
- Some properties of kenaf and kenaf combined waste composites  
*W Y Ahmad, J Salleh, M F Yahya, M I Abdul Kadir and M I Misnon, Universiti Teknologi MARA, Malaysia* 128
- Tensile and flexural properties of composites made from spinning waste  
*J Salleh, W Y W Ahmad, M R Ahmad, M F Yahya, S A Ghani and M I Misnon, Universiti Teknologi of MARA, Malaysia* 136
- UK technical textiles: issues relating to sustainability  
*B McCarthy, TechniTex Faraday Partnership, UK, and C Byrne, Mediatex, UK* 145

### **Part IV Waste management**

- The effect of a flocculent on the colour removal properties of a conditioned activated sludge  
*G Smart, University of Bolton, UK, and J Binkley, University of Manchester, UK* 153
- The anaerobic digestion of textile desizing wastewater  
*R Dinsdale, University of Glamorgan, UK, K Bryne and D Tucker, Water Development Services, UK* 163
- Effluent treatment using a submerged aerated filter  
*E Groom, Queen's University Belfast, UK* 168
- Effluent treatment at Thos. Chadwick & Sons Ltd  
*M Madden, ENCO, UK, and M Andrews, Thos. Chadwick & Sons Ltd* 170
- Protective properties of textiles dyed with natural dyes  
*D Gupta, IIT Delhi, India* 182

### **Part V Novel technologies**

- Tandem wet-on-wet foam application of both crease-resist and antistatic finishes  
*J Pearson, University of Huddersfield, UK, and A Elbadawi, Industrial Research and Consultancy Centre, Sudan* 195
- An all natural slip resistant and absorbent fibrous material  
*S Hutchinson, North Carolina State University, USA* 200
