

- one of the six most authentic collections of *Hadīth* and ranks second in importance only to that of Al-Bukhari.
18. 'Umar Al-Khaṭṭāb (رضي الله عنه), d. 23AH/644 CE  
The second Caliph of Islām.
  19. 'Uthmān bin 'Affān (رضي الله عنه), d. 35AH/656 CE  
The third Caliph of Islām.
  20. Zaid bin Thābit (رضي الله عنه), d. 45AH/665 CE  
One of the most knowledgeable Companions and the scribes of the Prophet (ﷺ). He was particularly knowledgeable in the laws of inheritance.

## CALCULATED EXAMPLES

These examples are not a substitute for reading the book but a supplement to illustrate the principles and provide a quick reference for common situations.

As in all cases of *Mirāth* the debts of the deceased must be settled, funeral expenses paid and the deceased's will executed before distribution of the remaining estate.

All the examples assume that there are no impediments to inheritance for any of the heirs. The heirs stated in each example are the only surviving heirs/claimants.

The results shown in these calculated examples A<sub>1</sub>1 to Y<sub>6</sub>12 are applicable to all the four Sunni *Fiqh*.

### Note on siblings

All siblings (Bf, Sf, Bc, Sc, Bu and Su) are totally excluded by the presence of S, SS, SSS etc.

All siblings are also totally excluded by the presence of F, FF, FFF etc. according to the *Hanafi Fiqh*.

Situations where a sibling (Bf, Sf, Bc, Sc, Bu and Su) coexists with S, SS, SSS are not mentioned in these examples as all the siblings would be totally excluded in such situations.

### Note on grandparents

For the purposes of the *Hanafi Fiqh*, in all the examples in this section father (F) can be substituted by the paternal grandfather (FF) in the absence of the father (F) unless otherwise stated. See sections 16.2, 16.3 and 19.2.1 for details.

The calculated examples in this section are arranged thus:

- S, SS or SSS amongst heirs  $A_1..M_1$
- No S or SS h.l.s. but D, DS or DSS amongst heirs  $A_2..K_2$
- D and siblings amongst heirs  $A_3..Y_3$
- Ds and siblings amongst heirs  $A_4..Y_4$
- No descendants and no siblings amongst heirs  $A_5$
- No descendants but siblings present amongst heirs  $A_6..Y_6$
