ADVANCED MANAGEMENT ACCOUNTING

THIRD EDITION

Robert S. Kaplan

Harvard Business School

Anthony A. Atkinson

University of Waterloo

In its 3rd edition, authors Robert Kaplan and Anthony Atkinson provide leading-edge treatment of innovative management accounting issues used by major companies throughout the world. The book will appeal to all those who want a systematic *management-oriented* approach to advance management topics related to management accounting. Each chapter in the text is accompanied by cases to illustrate the concepts discussed.

KEY FEATURES

- ▼ Comprehensive coverage of Activity-Based-Costing and the Balanced Scorecard method as the unifying framework throughout the text.
- ▼ Material related to transfer pricing is completely updated to reflect more modern approaches.
- ▼ A separate chapter prominently features Economic Value Added (EVA).
- ▼ New cases illustrating ABC and the Balanced Scorecard are incorporated throughout.
- ▼ The text goes beyond reviewing cost accounting topics that students have already covered in other courses.
- ▼ In addition to the many new cases added, old favourites have been retained and updated (e.g., incentive compensation, decentralization and management control systems).
