

CONTENTS

1. Structure of the Atom (i) (Quantum Mechanical Approach: Dalton to Bohr-Sommerfeld)	1 – 89
2. Structure of the Atom (ii) (Wave Mechanical Approach)	90 – 150
3. Modern Periodic Table and Electronic Configuration of Atoms	151 – 230
4. Periodic Properties	231 – 312
5. Radioactivity, Isotopes, Isobars and Isotones	313 – 335
6. Nuclear Transmutations and Artificial Radioactivity	336 – 393
7. <u>Chemical Bonding</u> : Lewis Theory	394 – 485
8. <u>Chemical Bonding</u> : Orbital Concept	486 – 571
9. Structure of Solids	572 – 626
10. <u>Oxidation-Reduction Reactions</u>	627 – 648
11. Standard Electrode Potentials	649 – 685
12. Modern Concepts of Acids and Bases	686 – 711
13. Non-aqueous Solvents	712 – 728
14. Principles and Processes of Metallurgy	729 – 757
15. Various Reactive Forms and Isotopes of Hydrogen	758 – 781
16. General Study of Hydrides	782 – 807
17. Heavy Water (D ₂ O)	808 – 822
18. General Characteristics of Group 1 (IA) Elements : Alkali Metals	823 – 846
19. <u>Chemistry of Lithium and Its Compounds</u>	847 – 858
20. General Characteristics of Group 2 (IIA) Elements : Alkaline Earth Metals	859 – 883
21. <u>Chemistry of Beryllium, Radium, their Compounds and Portland Cement</u>	884 – 901
22. General Characteristics of Group 13 (III A) Elements : Boron Group Elements	902 – 919
23. <u>Chemistry of Group 13 (III A) Elements, their Compounds and Ceramics Industry</u>	920 – 951
24. Hydrides of Boron : Boranes	952 – 963
25. General Characteristics of Group 14 (IV A) Elements : Carbon Group Elements	964 – 977
26. Compounds of Carbon	978 – 983
27. Carbides	984 – 992
28. Metallic Carbonyls	993 – 1016
29. Compounds of Silicon and Glass Industry	1017 – 1035
30. General Characteristics of Group 15 (V A) Elements : Nitrogen Group Elements	1036 – 1049
31. Fertilisers	1050 – 1060

32. Hydrides, Oxides and Oxy acids of Nitrogen	... 1061 – 1098
33. Nitrides	... 1099 – 1104
34. Oxides, Oxy acids, Halides and Oxyhalides of Phosphorus	... 1105 – 1129
35. General Characteristics of Group 16 (VI A) Elements : Oxygen Group Elements,	... 1130 – 1049
36. Oxides, Oxy acids, Halides and Oxyhalides of Sulphur	... 1150 – 1187
37. General Characteristics of Group 17 (VII A) Elements : Halogens	... 1188 – 1200
38. Fluorine and Fluorocarbons	... 1201 – 1212
39. Halogen Acids : Hydracids or Hydrogen Halides	... 1213 – 1221
40. Binary Halogen-Oxygen Compounds and Oxyacids of Halogens	... 1222 – 1241
41. Interhalogen Compounds, Polyhalides and Pseudohalogens	... 1242 – 1256
42. Elements of Group 18 (Zero) : Noble Gases	... 1257 – 1284
43. Coordination Compounds	... 1285 – 1346
44. Characteristics of d-Block Elements (Transition and Inner-transition Elements)	... 1347 – 1379
45. Group Discussion of d-Block Elements	... 1380 – 1394
46. Extaction, Properties and Uses of Some d-and f-Block Elements	... 1395 – 1449
47. Some Compounds of d-and-f Block Elements	... 1450 – 1513
SUBJECT INDEX	... 1514 – 1520
