

# Index

≡ (operator), 66, 141, 142  
< >, 10  
-> (arrow operator), 66, 124, 146, 148  
\* (operator), 66, 141-142  
: (used in inheritance), 60  
:: (scope resolution operator), 22, 112-113, 438  
. (dot operator), 23, 25-26, 146, 148  
<< (output operator), 13-14, 292, 338  
>> (input operator), 13-14, 299, 338  
[ ] (array subscripting operator), 222-226  
~ (for destructor function), 44

## A

abort( ) function, 378  
adjustfield format flag, 275, 276  
<algorithm> header, 509  
Algorithms, 476, 509-518  
    table of, 510-512  
allocator type, 477  
Allocators, 477  
Anonymous unions, 69-70, 74-75  
append( ) function, 522-523  
argc, argv convention, 3  
Arguments, default. *See* Default arguments  
Array(s)  
    based I/O, 466-470  
    bounds checking, 151-153, 169-171, 225-226  
    dynamic, 480  
    dynamically allocated, 134, 136-137, 165-166  
    of objects, 119-123, 137-138  
Arrow operator (->), 66, 124, 146, 148  
asm statement, 463, 464, 465  
Assembly language instructions, embedding,  
    463, 464, 465  
assign( ), 522

Assignment operations  
    and copy constructors, 168  
    and functions, 149-150  
    and objects, 89-94  
    and overloaded assignment operator,  
        218-221

## B

bad( ) function, 335  
bad\_alloc exception, 401  
badbit flag, 335  
bad\_typeid exception, 410  
Base class  
    access control, 234-238, 240-243  
    definition of, 59  
    indirect, 252  
    inheriting, general form for, 61-62  
    passing arguments from derived class to,  
        244-245, 246-249  
    virtual, 259-261  
basefield format flag, 275, 276  
basic\_fstream, 275  
basic\_ifstream, 275  
basic\_ios, 274  
basic\_iostream, 274, 275  
basic\_istream, 274, 275  
basic\_ofstream, 275  
basic\_ostream, 274, 275  
basic\_streambuf, 274  
basic\_string class, 519  
before( ) function, 409  
begin( ) function, 482, 487, 525  
Binary I/O  
    and character translations, 314, 321-322  
    unformatted, 320-326

Binary operators, overloading, 199-211  
 bool data type, 30, 32, 207  
 boolalpha  
     format flag, 275, 276, 290-291  
 I/O manipulator, 288, 290-291

**C****C++**

    differences between C and, 28-32, 532  
     similarities between C and, 2, 3  
**C++, Standard**, 2, 7-12  
     differences between C++ and, 8-9

**Copy constructors**, 101, 106, 167-174, 221  
     and default arguments, 183  
     general form of, 169  
**count( ) algorithm**, 510, 513-514  
**count\_if( ) algorithm**, 510, 513-514  
**cout stream**, 13, 273  
*<cstdlib>* header, 132  
**c\_str( ) function**, 524-525  
*<cstring>* header, 10

**D**

**Data type, object type as**, 5  
**dec**  
     format flag, 275, 276, 279  
     I/O manipulator, 288  
**Decrement operator (- -), overloading for**  
     postfix and prefix, 210-211, 217-218  
**Default arguments**, 177-183, 199  
     and ambiguity, 188  
**delete operator**, 130-133  
     and dynamically allocated arrays, 134  
**Derived class**  
     definition of, 59  
     general form of, 61-62  
     inheriting multiple base classes, 252-257

passing arguments to base class from, 244-245, 246-249  
 pointers to, 347-349  
 and virtual base classes, 259-261  
**D**estructors, 44-45  
 as in-line functions, 81  
 example uses for, 48-51  
 and inheritance, 244-249  
 and multiple inheritance, 252, 256-257  
 and parameters, 53  
 and passing objects to functions, 99-101  
 and returning objects from functions, 104-106  
**D**ot operator (.), 23, 25-26, 146, 148  
**d**ynamic\_<ast>, 420-428  
 to replace typeid, 422, 425-426

**E**

early binding, 362-363  
**E**ncapsulation, 4, 7, 61, 69, 450  
**e**nd( ) function, 482, 487, 525  
**e**ndl I/O manipulator, 288  
**e**nds I/O manipulator, 468  
**e**of( ) function, 315-316, 318, 335, 467  
**c**ofbit flag, 335  
**e**rase( ), function, 482, 484, 487, 523, 527-528  
**E**rror handling, run time. *See Exception handling*  
**E**xception handling, 130, 131, 372, 386-400  
 and catching all exceptions, 394, 395-397  
 general operation of, 386-389  
 and new, 401-404  
 and restricting exceptions thrown, 394-395, 397-399  
 and rethrowing exceptions, 395, 399-400  
**e**xit( ) function, 389  
**e**xplicit specifier, 460, 462  
**E**xtraction operator (>>). *See Input operator*  
**E**xtractors (extractor functions), creating, 299-302

**F**

**f**ail( ) function, 335  
**f**ailbit flag, 335  
**f**alse value, 30, 207  
**F**ile I/O  
 basics, 313-320  
 and character translations, 314  
 customized, 338  
 and console I/O, 270, 338  
**F**ile pointers  
 get, 332, 333-334  
 put, 332-333  
**f**ill( ) function, 283-285  
**f**ind( ) function, 504, 507, 524  
**f**ixed  
 format flag, 275, 276  
 I/O manipulator, 288  
**f**lags( ) function, 278, 280, 282  
**f**loatfield format flag, 275, 276  
**f**lush( ) function, 328-329  
**f**lush I/O manipulator, 288  
**f**mtflags, 275, 276  
**F**ormat flags, I/O, 275-283  
**F**orward reference, 110-111  
**f**printf( ) function, 316  
**f**ree( ) function, 49, 130, 131, 132  
**F**riend functions, 107-113, 126  
**f**riend keyword, 107  
**f**scanf( ) function, 316  
**f**stream class, 275, 313, 319  
<fstream> header, 313  
**F**unction, finding address of overloaded, 189-191  
**F**unction overloading, 5, 33-37  
 and ambiguity, 187-188  
 constructor, 161-166  
 and default arguments, 177-181, 188  
 vs. generic functions, 377, 379  
 and in-lining, 78-79  
 vs. virtual functions, 351-352  
*See also Copy constructors*  
<functional> header, 478

## Function(s)

conversion, 446-449  
friend, 107-113  
generated, 375  
generic. *See Generic functions*  
in assignment statements, using, 149-150  
*in-line. See In-line functions*  
member. *See Member functions*  
objects, 478  
operator. *See Operator functions*  
parameterless, 28-29  
passing objects to, 96-101  
passing references to, 140-145  
pointers to overloaded, 189-191  
predicate, 477-478  
prototyping, 29, 30-31  
return value and, 29  
returning objects from, 102-106  
returning references from, 149-153  
virtual. *See Virtual functions*

## G

gcount( ) function, 321  
Generated function, 375  
Generic class(es), 274, 372, 380-386  
declaration, general form of, 380  
with multiple generic data types, 385-386  
Generic functions, 372, 373-379, 380-386  
explicitly overloading, 378-379  
general form for, 373  
with multiple generic types, 376-377  
versus overloaded functions, 377, 379  
get( ) function, 321, 322, 323, 327, 328  
Get pointer, 332, 333-334  
getc( ) function, 327  
getline( ) function, 327-328, 329  
good( ) function, 335, 337  
goodbit flag, 335

## H

Headers, 8-11, 444  
hex  
format flag, 275, 276, 279

I/O manipulator, 288

Hierarchical classification, 6, 7, 59

## I

ifstream class, 275, 313  
#include statement, 9-10, 11  
Increment operator (+ +), overloading for  
postfix and prefix, 210-211, 217-218  
Inheritance, 4, 6, 7, 59-65  
and class access control, 234-243  
and constructors and destructors, 244-249  
and friend functions, 109  
general form for class, 234  
multiple, 252-257  
and virtual base classes, 259-261  
Initialization of objects, 43-44, 46-47, 134  
copy constructors and, 168-171  
overloaded constructors and, 161-166  
In-line functions, 75-79  
automatic, 80-82  
to define constructors and destructors, 81-82  
versus parameterized macros, 77  
inline specifier, 76  
Input operator (> >), 13-14, 299, 338  
insert( ) function, 482, 484, 487-488, 491, 492,  
523, 527-528  
Inserter ( inserter functions), creating,  
292-297  
Insertion operator (< <). *See Output operator*  
int, default to, 29  
internal  
format flag, 275, 276  
I/O manipulator, 288  
I/O  
array-based, 466-470  
binary. *See Binary I/O*  
console, 13-18, 270, 338  
customized, and files, 338-340  
file. *See File I/O*  
formatted, 275-291  
inserters and extractors, 292-302  
library, 270

manipulators. *See Manipulators, I/O*  
 operators, 13  
 random access, 331-334  
 status, checking, 334-337  
 streams, 273-274, 313 .  
**I/O library**, 270  
 C++ vs. Standard C++, 319-320  
**<iomanip> header**, 287  
**ios class**, 274, 275, 276, 277, 313  
 format flags, 275-278  
 I/O status flags, 334-335  
**ios::app**, 314  
**ios::ate**, 314  
**ios::beg**, 331  
**ios::binary**, 314, 321  
**ios::cur**, 331  
**ios::end**, 331  
**ios::in**, 314, 319  
**ios::nocreate**, 319-320  
**ios::noreplace**, 320  
**ios::out**, 314, 319  
**ios::trunc**, 314  
 iostate type, 334-335  
 iostream class, 275  
**<iostream> header**, 9, 14, 274, 275  
 iostream.h header file, 9  
**is\_open( ) function**, 315  
 istream class, 275, 300, 313  
 istrstream class, 466, 467  
 iterator type, 477, 487  
**Iterators**, 476-477, 486-487

**K**

Key/value pairs in maps, 476, 502, 505  
 Keywords, C++, table of, 39

**L**

Late binding, 362-363  
**left**  
 format flag, 275, 276  
**I/O manipulator**, 288

Libraries and namespaces, 437, 440  
 Linkage specifiers, 463-465  
**list class**, 476, 490-501  
 member functions, table of, 492-494  
 Local variables, declaring, 29-30, 31  
 Logical operators, overloading, 207-208

**M**

Macros, parameterized, 77  
**main( )**, 3, 30, 532  
**make\_pair( )**, 505-506, 507  
**malloc( ) function**, 49, 130, 131, 132  
**Manipulators, I/O**  
 creating custom, 309-312  
 and files, 338, 340  
 table of, 288  
 using, 287-291  
**map class**, 476, 502-509  
 member functions, table of, 503-505  
**math.h header file**, 10  
**Member functions**, 21, 22, 108  
 const, 455-458  
 defining, general form for, 22  
 and this pointer, 126, 128, 129  
**Member variables, public**, 25-26  
**Members, class**, 21  
 fully specifying, 112-113  
 static, 449-455  
**merge( ) function**, 491, 493, 498-499  
**modf( ) function**, 145  
**multimap**, 502  
**mutable keyword**, 456, 457-458

**N**

**name( ) function**, 409  
**Namespace**, 9, 11-12, 437-445  
 unnamed, 439-440, 445  
**namespace statement**, 8, 12, 437  
**<new> header**, 401  
**new operator**, 130-133  
 and allocation failures, 130-131, 401-402

and dynamically allocated arrays, 134, 136-137  
handling exceptions thrown by, 401-404  
to initialize dynamically allocated objects, 134, 135-136  
noboolalpha I/O manipulator, 290  
noshowbase I/O manipulator, 288  
noshowpoint I/O manipulator, 288  
noshowpos I/O manipulator, 288  
noskipws I/O manipulator, 288  
nothrow, 402, 403-404  
nounitbuf I/O manipulator, 288  
nouppercase I/O manipulator, 288  
npos constant, 522, 524

**O**

Object(s)  
arrays of, 119-123  
assigning, 89-94  
constructing, "on the fly," 58  
creating, 22-23  
data in, 23, 28  
definition of, 4-5  
factory, 414  
to functions, passing, 96-101  
from functions, returning, 102-106  
and inheritance, 6  
initializing. *See* Initialization of objects  
obtaining address of, 66  
by reference, passing, 146-148  
referencing public members of, 23  
Object-oriented programming (OOP), 2, 3-7  
Object pointers, 66-67, 124  
pointer arithmetic and, 125-126  
oct  
format flag, 275, 276, 279  
I/O manipulator, 288  
off\_type, 331  
ofstream class, 275, 313, 314  
open( ) function, 313-315, 319-320  
Operator functions  
definition of, 197

friend, using, 213-218  
member, general form of, 197  
Operator overloading, 6  
and the array subscripting operator ([ ]), 222-226  
and the assignment operator (=), 213, 218-221  
basics, 197-199  
binary, 199-211  
and built-in types, 204-205, 214-216  
increment (+ +) and decrement (- -), postfix and prefix, 210-211, 217-218  
I/O, 292-302  
relational and logical, 207-208  
unary, 209-212  
Operators and null-terminated strings, Standard C++, 519-520  
Operators, I/O, 13-14  
overloading, 292-302  
ostream class, 275, 292, 313  
ostringstream class, 466  
Output operator (< <), 13-14, 292, 338  
overload keyword, 39, 177  
Overloading  
function. *See* Function overloading  
operator. *See* Operator overloading  
Overriding virtual functions, 351-357

**P**

pair class, 478, 505-506  
Parameter list, declaring empty, 28-29  
pcount( ) function, 466-467  
peek( ) function, 328, 329-331  
Pointer declarations and overloaded functions, 189-191  
Pointer parameters vs. reference parameters, 140-142  
Pointers  
to derived classes, 347-349  
to objects. *See* Object pointers  
Polymorphism, 4, 5-6, 7, 409  
applying, 362-368

and function overloading, 34-36  
 and virtual functions, 346, 349-350, 362-368  
**pos\_type**, 332  
**precision( )** function, 283-285  
**Predicate functions**, 477-478  
**printf( )** and C++, 13  
**private access specifier**, 62, 68, 69, 234-235  
**protected access specifier**, 62, 234, 240  
**Protected class members**, using, 240-243  
**Prototypes**, 29, 30-31  
**public access specifier**, 21, 62, 234-235  
**push\_back( )** function, 482, 484, 485, 491, 493, 495  
**push\_front( )** function, 491, 493  
**put( )** function, 321, 322-323  
**Put pointer**, 332-333  
**putback( )** function, 328, 329-331

**Q**

**queue** class, 476

**R**

**rand( )** function, 354, 414  
**Random access I/O**, 331-334  
**Random events**, responding to at run time, 354-355, 366-368  
**rdstate( )** function, 335, 336-337  
**read( )** function, 321, 324-325  
**Reference parameters**, 140-145, 220-221  
 and ambiguity, 187-188  
 and friend operator functions, 216-217  
 and member operator functions, 205-206  
**References**, 140-155, 220-221  
 independent, 154-155  
 parameter. *See Reference parameters*  
 restrictions on, 154  
 returning, 149-153  
 used to pass objects, 146-148  
**register variables**, C versus C++, 532  
**reinterpret\_cast**, 429-430  
**Relational operators**, overloading, 207-208

**remove\_copy( )** algorithm, 511, 514-515  
**replace( )** function, 523, 527-528  
**resetiosflags( )** I/O manipulator, 288, 289  
**return statement**, 29  
**reverse( )** algorithm, 512, 515-516  
**rfind( )** function, 524  
**right**  
 format flag, 275, 276  
 I/O manipulator, 288  
**Run-time type identification (RTTI)**, 409-419

**S**

**scanf( )** and C++, 13  
**scientific**  
 format flag, 275, 276  
 I/O manipulator, 288  
**Scope resolution operator (::)**, 22, 112-113, 438  
**seek\_dir** enumeration, 331  
**seekg( )** function, 331-332, 333-334  
**seekp( )** function, 331-333  
**setbase( )** I/O manipulator, 288  
**setf( )** function, 277, 289  
**setfill( )** I/O manipulator, 288  
**setiosflags( )** I/O manipulator, 288, 289  
**setprecision( )** I/O manipulator, 288  
**setw( )** I/O manipulator, 287, 288  
**showbase**  
 format flag, 275, 276  
 I/O manipulator, 288  
**showpoint**  
 format flag, 275, 276  
 I/O manipulator, 288  
**showpos**  
 format flag, 275, 276, 277, 279  
 I/O manipulator, 288  
**size( )** function, 482, 485, 525  
**skipws**  
 format flag, 275, 276  
 I/O manipulator, 288  
**sort( )** function, 493, 497  
**splice( )** function, 491, 493-494  
**static class members**, 449-455

**static\_cast**, 429, 431  
**std namespace**, 11, 437, 442-444  
**stderr stream**, 273  
**stdin stream**, 273  
**stdio.h header file**, 10  
**stdout stream**, 13, 273  
**STL (Standard Template Library)**, 380, 474,  
 476-478  
**strcat( ) function**, 522  
**strcpy( ) function**, 449, 520, 522  
**streambuf class**, 274  
**Streams (I/O)**, 273-274, 313  
**streamsize type**, 284, 321  
**string class**, 474, 519-525  
 operators defined for, 521-522  
**String handling in C++**, 519-520, 525-527  
**<string> header**, 521  
**string.h header file**, 10  
**stringstream class**, 466, 467  
**<sstream> header**, 466  
**struct keyword**, 68-69, 71  
**Structured programming**, 3  
**Structures in C++**, 68-74

**I**

**tellg( ) function**, 332  
**tellp( ) function**, 332  
**Template functions**. *See Generic functions*  
**template statement**, 373, 375-376, 380  
**Templates**, 372  
**terminate( ) function**, 388, 395  
**this pointer**, 126-129  
 and friend operator functions, 213  
 and inserters, 292-293  
 and member operator functions, 199  
**throw**, 386-388, 395  
 statement, general form for, 388  
 clause, general form for, 394-395  
**time\_t type**, 165  
**transform( ) algorithm**, 512, 516-518  
**True and false in C and C++**, 30  
**true value**, 30, 207

**try statement**, 386-388, 389-392, 398  
**Type conversions and ambiguity**, automatic,  
 185-187  
**typeid operator**, 409, 410-419, 422, 426  
**type\_info**, 409, 413  
**<typeinfo> header**, 409  
**typename keyword**, 374, 376

**U**

**Unary operators**, overloading, 209-212  
**unexpected( ) function**, 395, 398  
**Unions**, 69-70, 72-75  
**unitbuf**  
 format flag, 275, 276  
 I/O manipulator, 288  
**unsetf( ) function**, 277, 289  
**uppercase**  
 format flag, 275, 276, 279  
 I/O manipulator, 288  
**using statement**, 438-439  
**<utility> header**, 478

**V**

**Variables**  
 global, declaring, 532  
 global vs. static, 450  
 local, declaring, 29-30, 31  
 objects as, 5  
 public member, 25-26  
**vector class**, 476, 479, 480-490  
 member functions, table of, 482-483  
 using iterator to access, 486-487  
**Virtual base class**, 259-261  
**Virtual functions**, 349-361  
 hierarchical nature of, 352-354, 361  
 and late binding, 363  
 overriding, 351-357  
 and polymorphism, 346, 349-350, 362-368  
 pure, 358-360  
**responding to run-time random events**  
 with, 354-355, 366-368

virtual keyword, 260, 349  
void keyword, 28-29, 30

**W**

wcerr stream, 273-274  
wchar\_t keyword, 532  
wcin stream, 273-274  
wclog stream, 273-274

wcout stream, 273-274  
width( ) function, 283-284  
write( ) function, 321, 323-324  
ws I/O manipulator, 288  
wstring class, 519

**X**

xalloc exception, 401
