

Brief Content

Chapter 1: Introduction

Chapter 2: Structure of the atom

ALIPHATIC COMPOUNDS

Chapter 3: Paraffins

Chapter 4: Unsaturated hydrocarbons

Chapter 5: Halogen derivatives of the plants

Chapter 6: Monohydric alcohols

Chapter 7: Ethers

Chapter 8: Aldehydes and ketones

Chapter 9: Fatty acids

Chapter 10: Tautomerism

Chapter 11: Polyhydric alcohols

Chapter 12: Unsaturated alcohols, ethers, carbonyl compounds and acids

Chapter 13: Nitrogen compounds

Chapter 14: Aliphatic compounds of sulfur, phosphorus

Chapter 15: Organo-metallic compounds

Chapter 16: Saturated dicarboxylic acids

Chapter 17: Hydroxy acids, stereo chemistry, unsaturated dicarboxylic acids

Chapter 18: Carbohydrates

ALICYCLIC COMPOUNDS

Chapter 19: Alicyclic compounds

AROMATIC COMPOUNDS

Chapter 20: Simple aromatic hydrocarbons

Chapter 21: Aromatic halogen compounds

Chapter 22: Aromatic Nitro compounds

Chapter 23: Aromatic Amino compounds

Chapter 24: Diazonium salts and their related compounds.

Chapter 25: Sulphonic compounds

Chapter 26: Phenols

Chapter 27: Alcohols, aldehydes, ketones and Quinones

Chapter 28: Aromatic acids

Chapter 29: Polynuclear hydrocarbons and their derivatives

HERTEROCYCLIC COMPOUNDS

Chapter 30: Heterocyclic compounds

Chapter 31: Dyes

CONTENTS

LIST OF JOURNAL ABBREVIATIONS	PAGE
	X
CHAPTER	
I. INTRODUCTION	I
Historical Introduction, 1. Analysis of Organic Compounds, 2. Structural Formulæ and Isomerism, 7. Saturated and Unsaturated Compounds, 8. Classification of Organic Compounds, 8.	
II. STRUCTURE OF THE ATOM	10
Structure of the Atom, 10. Electronic Theory of Valency, 11. Chelate Compounds, 14. Dipole Moments, 14. Electron Displacements in a Molecule, 15. Effect of Structure on Reactivity, 21. Hydrogen Bond, 21. Atomic and Molecular Orbitals, 22. Hybridisation of Bond Orbitals, 25. General Nature of Organic Reactions, 31. Principle of Microscopic Reversibility, 32. Kinetically and Thermodynamically Controlled Products, 32. Transition State Theory of Reactions, 33. Use of Isotopes in Organic Chemistry, 35.	
ALIPHATIC COMPOUNDS	
III. PARAFFINS	38
Some Individual Paraffins, 38. Nomenclature of the Paraffins, 44. Homologous Series, 47. General Methods of Preparation, 48. General Properties, 52. General Reactions, 54. PETROLEUM AND NATURAL GAS, 56. Cracking, 58. Synthetic Fuels, 60.	
IV. UNSATURATED HYDROCARBONS	62
OLEFINS: Nomenclature, 62. Preparation, 63. Reactions, 65. Polymerisation and Plastics, 77. Some Individual Olefins, 80. UNSATURATED COMPOUNDS WITH TWO OR MORE DOUBLE BONDS: Nomenclature, 83. Isolated Double Bonds, 83. Cumulated Double Bonds, 83. Conjugated Double Bonds, 84. Thiele's Theory of Partial Valencies, 85. M.O. Treatment of Butadiene, 88. Molecular Diagrams, 89. ACETYLENES: Nomenclature, 90. Acetylene: Preparation, 90. Reactions, 91. Effect of Hybridisation on Electronegativity of a Carbon Atom, 96. Homologues of Acetylene, 97.	
V. HALOGEN DERIVATIVES OF THE PARAFFINS	100
Nomenclature, 100. ALKYL HALIDES: Preparation, 100. 1,2-Shifts, 101. Reactions, 105. S _N 1 and S _N 2 Mechanisms, 106. Polar Effects, 107. Steric Effects, 107. Solvent Effects, 109. Ion pairs, 109. Elimination Reactions, 111. Some Individual Members, 114. DIHALOGEN DERIVATIVES: Preparation, 115. Reactions, 115. Some Individual Members, 116. TRIHALOGEN DERIVATIVES: Chloroform, 116. Bromoform, 118. Iodoform, 118. POLYHALOGEN DERIVATIVES: Carbon Tetrachloride, 118. Tetrachloroethane, 119. Hexachloroethane, 119. Fluorine Derivatives, 120.	
VI. MONOHYDRIC ALCOHOLS	124
Nomenclature, 124. Preparation, 124. Reactions, 128. Methods of Distinguishing Between the Three Classes of Alcohols, 132. Some Individual Members, 133. Determination of Structure, 136.	

CHAPTER	PAGE
VII. ETHERS	140
Nomenclature, 140. Preparation, 140. Reactions, 141. Some Individual Members, 143.	
VIII. ALDEHYDES AND KETONES	145
Nomenclature, 145. Preparation of Aldehydes and Ketones, 146. Reactions common to Aldehydes and Ketones, 149. Reactions Given by Aldehydes Only, 160. Reactions Given by Ketones Only, 162. Some Individual Members, 164. Chloral, 167. Pinacol-Pinacone Rearrangement, 171. Bridged-ions, 172.	
IX. FATTY ACIDS	174
FATTY ACIDS: Nomenclature, 174. Preparation, 175. Reactions, 176. Some Individual Members, 179. ESTERS: Nomenclature, 186. Preparation, 187. Reactions, 191. Ortho-Esters, 194. Esters of Inorganic Acids, 195. ACID CHLORIDES: Nomenclature, 197. Preparation, 197. Reactions, 198. Acetyl Chloride, 200. ACID ANHYDRIDES: Nomenclature, 201. Acetic Anhydride, 201. ACID AMIDES: Nomenclature, 203. Preparation, 203. Reactions, 204. HYDROXAMIC ACIDS, 207. IMIDIC ESTERS AND AMIDINES, 208. ACID HYDRAZIDES AND ACID AZIDES, 209. HALOGENO-ACIDS: Nomenclature, 210. Preparation, 210. Reactions, 212. Some Individual Members, 213.	
X. TAUTOMERISM	216
Tautomerism, 216. Estimation of Enol Content, 218. Enolisation, 220. Modern Theories of Tautomerism, 221. Preparation of Acetoacetic Ester, 224. Reactions, 225. ACETOACETIC ESTER SYNTHESSES, 227. MALONIC ESTER SYNTHESSES, 232. HYDROXYALDEHYDES AND HYDROXYKETONES: Principal Function, 235. Names of Prefixes and Suffixes of Functions, 235. Some Individual Hydroxyaldehydes and Hydroxyketones, 236. DIALDEHYDES: Some Individual Members, 238. DIKETONES: Some Individual Members, 240. ALDEHYDIC ACIDS: Some Individual Members, 242. KETONIC ACIDS: Some Individual Members, 243.	
XI. POLYHYDRIC ALCOHOLS	247
Nomenclature, 247. GLYCOLS: Preparation of Glycol, 247. Reactions, 248. Ethylene Oxide, 250. Dioxan, 252. General Methods of Preparing Glycols, 253. Pinacol, 253. POLY-METHYLENE GLYCOLS: Some Individual Members, 254. GLYCEROL: Preparation, 254. Reactions, 255. POLYHYDRIC ALCOHOLS, 258. OILS, FATS AND WAXES, 259.	
XII. UNSATURATED ALCOHOLS, ETHERS, CARBONYL COMPOUNDS AND ACIDS	265
UNSATURATED ALCOHOLS: Some Individual Members, 265. Hyperconjugation, 269. Allylic rearrangement, 272. UNSATURATED ETHERS: Some Individual Members, 274. UNSATURATED ALDEHYDES: Some Individual Members, 275. UNSATURATED KETONES: Some Individual Members, 277. UNSATURATED MONOCARBOXYLIC ACIDS: Nomenclature, 279. Preparation, 280. Reactions, 282. Some Individual Members, 284. PRINCIPLE OF VINYLOGY, 287. KETENS: Keten, 287. Diketen, 289.	
XIII. NITROGEN COMPOUNDS	292
Hydrogen Cyanide, 292. ALKYL CYANIDES: Nomenclature, 293. Preparation, 294. Reactions, 295. ALKYL <i>iso</i> CYANIDES: Preparation, 297. Reactions, 297. CYANOGEN AND ITS RELATED COMPOUNDS, 298. NITROPARAFFINS: Nomenclature, 301.	

Structure, 301. Preparation, 302. Reactions, 303. NITROSO-PARAFFINS, 306. MONOAMINES, 308. Nomenclature, 308. Preparation, 308. Preparation of Quaternary Compounds, 313. Reactions of the Amines, 313. QUATERNARY AMMONIUM COMPOUNDS, 318. DIAMINES: Some Individual Members, 320. UNSATURATED AMINES: Some Individual Members, 321. AMINOALCOHOLS: Some Individual Members, 322. AMINOACIDS, 322. Preparation and Reactions of Glycine, 322. Betaines, 325. ALIPHATIC DIAZO-COMPOUNDS: Diazomethane, 325. Diazoacetic ester, 329.

XIV. ALIPHATIC COMPOUNDS OF SULPHUR, PHOSPHORUS, ARSENIC AND SILICON 332

THIOALCOHOLS: Nomenclature, 332. Preparation, 332. Reactions, 333. THIOETHERS: Preparation, 334. Reactions, 335. THIOCYANIC ACID, *iso*THIOCYANIC ACID, AND THEIR DERIVATIVES, 336. ALKYL SULPHOXIDES, 338. ALKYL SULPHONES, 338. SULPHONIC ACIDS: Nomenclature, 338. Preparation, 339. Reactions, 339. THIOALDEHYDES AND THIOKETONES, 340. THIOACIDS, 340. DITHIOACIDS, 341. ALKYL-PHOSPHINES: Preparation, 341. Reactions, 342. ALKYL-ARSINES: Preparation, 343. Reactions, 343. Cacodyl Oxide and its Related Compounds, 344. ANTIMONY COMPOUNDS, 345. Bismuth Compounds, 345. ALKYL-SILANES: Preparation, 345. Reactions, 346. Silanols and Silicones, 346.

XV. ORGANO-METALLIC COMPOUNDS 348

GRIGNARD REAGENTS: Preparation, 348. Structure, 348. Reactions, 349. Synthetic Uses of the Grignard Reagents, 351. Abnormal Behaviour of Grignard Reagents, 359. ALKYL-METALLIC COMPOUNDS: Nomenclature, 360. Preparation, 361. Alkali Group, 361. Copper Group, 362. Organo-Zinc Compounds, 363. Organo-Cadmium Compounds, 364. Organo-Mercury Compounds, 365. Organo-Lead Compounds, 365. Preparation and Reactions of Free Alkyl Radicals, 365.

XVI. SATURATED DICARBOXYLIC ACIDS 368

Nomenclature, 368. Preparation, 368. Some Individual Members, 370. *N*-Bromosuccinimide, 375. Blanc's Rule, 380. Carbonic Acid and its Derivatives, 381. Urea, 383. Inclusion Complexes, 387. Compounds Related to Urea, 388.

XVII. HYDROXYACIDS. STEREOCHEMISTRY. UNSATURATED DICARBOXYLIC ACIDS 393

MONOBASIC HYDROXYACIDS: Nomenclature, 393. Preparation, 393. Reactions, 394. Some Individual Members, 397. STEREOCHEMISTRY, 399. Elements of Symmetry, 409. Resolution of Racemic Modifications, 411. Racemisation, 412. Walden Inversion, 413. Correlation of Configuration, 413. Neighbouring Group Participation, 415. Asymmetric Synthesis, 416. HYDROXY-DIBASIC AND POLYBASIC ACIDS, 417. UNSATURATED DICARBOXYLIC ACIDS, 423. GEOMETRICAL ISOMERISM, 425. Mechanism of Addition to Double and Triple Bonds, 428. Some Individual Unsaturated Dicarboxylic Acids, 430. Allenes and Spirans, 432. Optical Isomerism of Elements other than Carbon, 432.

XVIII. CARBOHYDRATES 436

Nomenclature, 436. Monosaccharides, 436. Configuration of the Monosaccharides, 456. Determination of the Size of Sugar-Rings, 458. Disaccharides, 460. Polysaccharides, 463.

ALICYCLIC COMPOUNDS

- XIX. ALICYCLIC COMPOUNDS 467
Nomenclature, 467. Preparation, 468. Diels-Alder Reaction, 472. Reactions, 474. Some Individual Members, 475. Ferrocene, 480. *Cycloalkynes*, 486. Baeyer's Strain Theory, 486. Theory of Strainless Rings, 488. Conformational Analysis, 488. Large Ring Compounds, 492.

AROMATIC COMPOUNDS

- XX. SIMPLE AROMATIC HYDROCARBONS 499
Benzene, 499. Properties, 501. Structure, 503. Aromaticity, 507. Methods of Orientation, 511. Substitution in the Benzene Ring, 514. Electrophilic Substitution, 516. *Ortho-para* Ratio, 523. Nucleophilic Substitution, 524. Free-radical Substitution, 526. Preparation of Benzene Homologues, 529. Synthesis of Aromatics from Aliphatics, and vice-versa, 541.
- XXI. AROMATIC HALOGEN COMPOUNDS 544
ADDITION COMPOUNDS, 544. NUCLEAR SUBSTITUTION PRODUCTS: Preparation, 544. Properties, 546. Benzyne mechanism, 547. SIDE-CHAIN SUBSTITUTED COMPOUNDS: Preparation, 549. Some Individual Members, 550. Polyvalent Iodine Compounds, 551.
- XXII. AROMATIC NITRO-COMPOUNDS 553
Methods of Nitration, 553. Properties, 554. Some Individual Members, 554. Charge-transfer Complexes, 557. AROMATIC NITROSO-COMPOUNDS: Nitrosobenzene, 560. Phenylhydroxylamine, 561. Reduction Products of Nitro-Compounds, 562.
- XXIII. AROMATIC AMINO-COMPOUNDS 564
Preparation, 564. Some Individual Members, 566. Diamines, 578.
- XXIV. DIAZONIUM SALTS AND THEIR RELATED COMPOUNDS 582
DIAZONIUM SALTS: Diazotisation, 582. Nomenclature, 583. Replacement Reactions, 583. Reactions in which Nitrogen is Retained, 588. Structure of Diazonium Salts, 591. Phenylhydrazine, 594. DIAZOAMINO- AND AMINOAZO-COMPOUNDS, 595. Azoxybenzene, 599. Azobenzene, 600. Hydroxyazo-Compounds, 601. Hydrazobenzene, 602. Benzidine Rearrangement, 602.
- XXV. SULPHONIC ACIDS 606
Methods of Sulphonation, 606. Some Individual Sulphonic Acids, 608. Sulphinic Acids, 614. Thiophenol, 615. Aminobenzenesulphonic Acids, 615.
- XXVI. PHENOLS 618
MONOHYDRIC PHENOLS: Phenol and its Derivatives, 618. Homologues of Phenol, 631. DIHYDRIC PHENOLS, 632. TRIHYDRIC PHENOLS, 635. AROMATIC ETHERS, 637. Claisen Rearrangement, 640.

CHAPTER XXVII.	ALCOHOLS, ALDEHYDES, KETONES AND QUINONES	644
	Aromatic Alcohols, 644. AROMATIC ALDEHYDES: Benzaldehyde and its Derivatives, 645. PHENOLIC ALDEHYDES: Preparation, 655. Some Individual Members, 658. AROMATIC KETONES: Some Individual Members, 660. STEREOCHEMISTRY OF ALD-OXIMES AND KETOXIMES, 666. QUINONES: Benzoquinones, 668. Quinols, 673.	
XXVIII.	AROMATIC ACIDS	675
	NUCLEAR-CARBOXYLIC ACIDS: Preparation, 675. Some Individual Members, 675. The <i>ortho</i> -Effect, 686. ACIDS WITH CARBOXYL GROUP IN SIDE-CHAIN: Some Individual Members, 689. DIBASIC AROMATIC ACIDS: Some Individual Members, 692.	
XXIX.	POLYNUCLEAR HYDROCARBONS AND THEIR DERIVATIVES	697
	Diphenyl, 697. Diphenylmethane, 700. Triphenylmethane, 701. Tetraphenylmethane, 703. Hexaphenylethane, 703. Dibenzyl, 705. Stilbene, 705. Benzoin, 706. Naphthalene, 708. Acenaphthene, 723. Indene, 724. Fluorene, 725. Anthracene, 726. Phenanthrene, 734. Molecular Overcrowding, 739.	
HETEROCYCLIC COMPOUNDS		
XXX.	HETEROCYCLIC COMPOUNDS	741
	Furan and its Derivatives, 741. Thiophen and its Derivatives, 745. Pyrrole and its Derivatives, 746. Indole and Related Compounds, 750. Nomenclature of Heterocyclic Compounds, 753. Pyrazoles, Glyoxalines, Oxazoles, <i>iso</i> -Oxazoles, Thiazoles, Sydnones, 754. Pyridine and its Derivatives, 756. Methods of Ring Fission, 761. Quinoline, 763. <i>iso</i> Quinoline, 765. Acridine, 767. Pyrones, 767. Diazines, 769.	
XXXI.	DYES	771
	Relation Between Colour and Constitution, 771. Nomenclature of Dyes, 778. Classification, 779. Nitro-Dyes, 781. Nitroso-Dyes, 781. Azo-Dyes, 782. Diphenylmethane Dyes, 785. Triphenylmethane Dyes, 786. Xanthen Dyes, 790. Diphenylamine Dyes, 795. Heterocyclic Dyes, 795. Vat Dyes, 800. Anthraquinoid Dyes, 806. Sulphur Dyes, 808. Phthalocyanine Dyes, 808.	
EXAMINATION QUESTIONS		810
APPENDIX		814
	NOMENCLATURE: Order of Naming Radicals, 814. Greek Alphabet, 815. Writing of Names, 815. ORGANIC CHEMISTRY PUBLICATIONS: Dictionaries, 816. Physical Constants, 816. Reference Books, 816. Chemical Journals, 817. Searching the Literature, 818. Use of Beilstein, 819.	
INDEX		823
